Bruce,

Here is what we propose for the emergency scaffold at the east entry of the Lawrence County Courthouse. If we can get approval by Tuesday next week, we should be able to have it completed by July 3<sup>rd</sup>.

1. Erect and Dismantle scaffold at the east entry. Approximate height of 39' x 28' wide.
2. Scaffold to be built to allow entry through right side door of entranceway.
3. Fully deck upper most level of scaffold with scaffold planking with 1 layer of ¾" plywood overlay.
4. Install safety netting at upper level to help prevent small debris from falling.
5. Scaffold planking at lower level immediately above entrance way.
6. Additional 5 x 7 scaffold bay with decking for additional overhead protection on sidewalk in front of entrance way.
7. Rental fees are included for 6 months from date of install. Each additional month after first 6 months is \$500.00.

Total \$35,250.00 payable in full upon completion of install.

Please let me know if you have any questions.

Thanks!
