Good Morning

Sorry for the late contact, but I would like to quickly address the photos labeled "2 PET TO IMPROVE SEC LINE PICS" included in the June 23, 2020 information packet.

After reviewing the agenda for the Commissioners meeting for June 23, 2020, and looking through the documents found here at https://www.lawrence.sd.us/AgendaCenter/ViewFile/Agenda/_06232020-824.

I noticed in "2 Pet to improve section line pics" that there appears to be either a complete misnaming of the pictures or an attempt to **mislead** anyone looking at these picture, the link is here.

<https://www.lawrence.sd.us/AgendaCenter/ViewFile/Item/261?fileID=3786>

Slide 1 of the picture show displayed shows a top down view of the section line, the remainder of the pictures are not the section line, nor do they include any picture depicting the section line or the property impacted. They are pictures of Rath property that do not in any way encompass the section line or the 66ft right of way.

Attached are a few pictures of the true section line as marked by Randy Deibert who is a Commissioner and representing BHFA as a surveyor. The markers tagged with yellow engineering tape are the true section line and the markers with red engineering tape depict the encroachment on my property based on the 33ft that will be set aside on to my property.

Those who walked the section line last week will know the truth and the burden this section line places on me, those who have not and look at the pictures as they are labeled will see a completely different picture based on the submitted photos on the county agenda.

I do hope it was a misnaming error, if not it was a direct attempt to mislead the Commission and the citizens of Lawrence County.

Thanks

Fred Bourne
