To: commissioners@lawrence.sd.us

Dear Commissioners,

I'm writing to request that all Commissioners work to protect the water, wildlife, tourism and small businesses from the impact of further exploration in the Black Hills. Prevention of water contamination should be the number one priority and these projects can have disastrous consequences for everyone. The goal for these companies is purely profit and we are left with scarred landscapes and tainted resources with no regard to our welfare. These activities need to be stopped.

Thank you,

Michael Hughes
